EDUCATION

The National Institute of Engineering, Mysore

Bachelor of Engineering in Computer Science and Engineering (AI & ML)

Aug 2024 – May 2028

CGPA: 9.3/10

EXPERIENCE

HSH Technologies

Software Engineering Intern (Freelance)

Sep 2026 – Present

Remote

- Engineered **Translog**, an **AI-powered freight quotation platform** in **Python** that ingests Gmail enquiries, extracts shipment details using **LLMs**, validates requests, and automates end-to-end quotation workflows.
- Built LLM-based extraction and clarification pipelines on **Redis** and **RQ** job queues with multi-account Gmail integration, persistent state, failure isolation, and **human-in-the-loop** approval.
- Automated **WebCargo eBooking** rate search using **Playwright** browser automation, implementing live rate discovery, airport/IATA code resolution, goods-type handling, and fastest-eligible-rate selection.
- Links: github.com/aayush2724/Translog | translog-demo.onrender.com

OWASP NIE Student Chapter

President

Aug 2026 – Present

Mysore, India

- Lead chapter initiatives in **web application security**, **open source**, **Git/GitHub**, and secure development practices, coordinating technical programs and student activities.
- Organized workshops and technical sessions for **200+ participants**, mentoring students in cybersecurity and software development.

PROJECTS

Auralis – AI Sales Intelligence Platform

React.js, TypeScript, FastAPI, LangGraph, PostgreSQL, Redis, FAISS, Docker

Jul 2026

GitHub | Live

- Built a **multi-agent** sales assistant with **LangGraph** that classifies customer objections with **94% confidence**, detects persona and sentiment, and generates contextual responses in **under 2 seconds**.
- Implemented a **Retrieval-Augmented Generation (RAG)** pipeline with **FAISS** vector search, plus Redis-backed sessions, JWT authentication, WebSockets, Docker, and **GitHub Actions CI/CD**.

DeskGuard – Real-Time Library Seat Booking

React.js, Node.js, Express.js, PostgreSQL, Redis, SSE, Docker

May 2026

GitHub | Live

- Built a **full-stack seat booking platform** with live desk maps, QR code check-ins, and automated seat reclamation.
- Implemented **Server-Sent Events (SSE)** for real-time availability without polling, with **PostgreSQL** audit logging and **Redis TTL**-based sessions for automatic seat recovery.

Beatzy – Music Intelligence Platform

Python, FastAPI, React.js, Node.js, PostgreSQL, Redis, BullMQ

Apr 2026

GitHub | Live

- Developed a **full-stack audio analysis platform** for BPM, key, chord, and mood detection, lyric synchronization, and metadata enrichment using **librosa** and **YAMNet**.
- Designed an **asynchronous job pipeline** with **BullMQ**, **Redis**, and **PostgreSQL**, integrating third-party metadata APIs and deploying **microservices** on Render and Vercel.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript (ES6+), TypeScript, SQL, Java

AI/ML: LLMs, LangGraph, Multi-Agent Systems, RAG, FAISS, Vector Search, librosa, YAMNet

Frontend: React.js, Vite, Tailwind CSS, HTML5, CSS3, Framer Motion

Backend: FastAPI, Node.js, Express.js, REST APIs, WebSockets, SSE, JWT, BullMQ, RQ

Databases: PostgreSQL, MongoDB, Redis, Firebase

DevOps & Tools: Docker, Linux, Git, GitHub Actions, CI/CD, Playwright, Postman, Vercel, Render

Core CS: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOP

ACHIEVEMENTS

- 3rd Place, ThinkRoot x Vortex'26 (NIT Trichy):** Built LeadForge in 24 hours, competing against 100+ teams.
- 3x Hackathon Finalist**, including InnovaHack and ThinkRoot x Vortex'26.
- 650+ DSA problems** solved across LeetCode and structured practice.
